Barranquilla, Atlántico, Colombia

Extracto

I code apps using Swift, Kotlin, and LLM, a logic programming language that enables me to think more abstractly and efficiently. I have over 14 years of experience in iOS development, and I am proficient in both Objective-C and Swift. I am also skilled in using SwiftUI, a modern framework that allows me to create high-quality user interfaces and deliver smooth user experiences. In addition to developing apps for iOS, I also work on Kotlin Multiplatform Mobile, a technology that enables me to write code once and run it on both iOS and Android platforms. This way, I can ensure that the apps I create are consistent, compatible, and reliable across different devices and operating systems. I enjoy working with cross-functional teams and collaborating with other developers to write clean, maintainable, and efficient code that adheres to best practices and coding standards. I am also an AI enthusiast and a Python user, and I like to explore new ways of applying AI and machine learning to app development.

Experiencia

CoderLabs

Mentor (Founder)

noviembre de 2021 - Present (4 años 6 meses)

I'm Coding apps using Swift, Kotlin and nowadays including Generative AI in my daily work

X-Team

Software Engineer

octubre de 2022 - febrero de 2023 (5 meses)

My primary focus was on using SwiftUI to create a high-quality user interface and deliver a smooth user experience. I worked with a cross-functional team to ensure that the app met the project's requirements and delivered the desired outcomes.

In addition to developing the app for iOS, I also worked on Kotlin Multiplatform Mobile to ensure that the app runs seamlessly on both iOS and Android platforms. This involved collaborating with other developers to write clean, maintainable, and efficient code that adheres to best practices and coding standards.
